

**Claims:**

1. A lubricant for a run-flat tire, comprising:
  - (a) a carrier fluid selected from the group consisting of water-soluble fluid, a water-miscible fluid and mixtures thereof;
  - (b) a thickener; and
  - (c) a surfactant.
2. The lubricant of claim 1 wherein the carrier fluid comprises a polyhydroxyl compound selected from the group consisting of diols, triols, tetrols, polyhydric alcohols, glycol ethers and mixtures thereof.
3. The lubricant of claim 2 wherein the carrier fluid is selected from the group consisting of polyethylene glycols, polypropylene glycols, polybutylene glycols, polyhexylene glycols, glycerin, sorbitol and mixtures thereof.
4. The lubricant of claim 1 wherein the carrier is present in amount ranging from about 10% to about 95%, by weight, based on the total weight of the lubricant.
5. The lubricant of claim 1 wherein the thickener is selected from the group consisting of a clay, kieselguhr earths, a cellulosic material, a pre-gelled cellulose, an associative-type thickener, a wax, fumed silica, pigments, polyisobutylene, an alkali earth metal soap, aluminum stearate, polyurea, polyethyleneterephthalate, polyethylenes, polycarbohydrates, polycarboxylates, polyacrylates, and mixtures thereof.
6. The lubricant of claim 5 wherein the thickener is a clay.
7. The lubricant of claim 6 wherein the clay is selected from the group consisting of bentonite clay, hectorite clay and mixtures thereof.
8. The lubricant of claim 5 wherein the thickener is present in an amount ranging from 0.5% to about 10%, by weight, based on the total weight of the lubricant.

9. The lubricant of claim 1 wherein the surfactant is a silicone surfactant.
10. The lubricant of claim 9 wherein the surfactant is an alkoxyated silicone.
11. The lubricant of claim 1 wherein:
  - (a) the carrier fluid is present in an amount ranging from about 10% to about 95%, by weight, based upon the total weight of the lubricant and is selected by the group consisting of polyethylene glycols, polypropylene glycols, polybutylene glycols, polyhexylene glycols, glycerin, sorbitol and mixtures thereof,
  - (b) the thickener is a clay selected from the group consisting of bentonite clay, hectorite clay, and mixtures thereof, the clay being present in an amount ranging from about 0.5% to about 40%, by weight, based upon the total weight of the lubricant, and
  - (c) the surfactant is an alkoxyated silicone surfactant.
12. A run-flat tire, comprising:
  - (a) an outer tire,
  - (b) an inner support ring, disposed interiorly of the carcass and having a surface facing the interior surface of the tire, and
  - (c) a lubricant disposed between the facing surface and the interior of the tire, the lubricant comprising:
13. The run-flat tire of claim 12 wherein the carrier fluid comprises a polyhydroxyl compound selected from the group consisting of diols, triols, tetrols, polyhydric alcohols, glycol ethers and mixtures thereof.
14. The run-flat tire of claim 13 wherein the carrier fluid is selected from the group consisting of polyethylene glycols, polypropylene glycols, polybutylene glycols, polyhexylene glycols, glycerin, sorbitol and mixtures thereof.

15. The run-flat tire of claim 12 wherein the carrier is present in amount ranging from about 10% to about 95%, by weight, based on the total weight of the lubricant.

16. The run-flat tire of claim 12 wherein the thickener is selected from the group consisting of a clay, kieselguhr earths, a cellulosic material, a pre-gelled cellulose, an associative-type thickener, a wax, fumed silica, pigments, polyisobutylene, an alkali earth metal soap, aluminum stearate, polyurea, polyethyleneterephthalate, polyethylenes, polycarbohydrates, polycarboxylates, polyacrylates, and mixtures thereof.

17. The run-flat tire of claim 16 wherein the thickener is a clay.

18. The run-flat tire of claim 17 wherein the clay is selected from the group consisting of bentonite clay, hectorite clay and mixtures thereof.

19. The run-flat tire of claim 16 wherein the thickener is present in an amount ranging from 0.5% to about 40%, by weight, based on the total weight of the lubricant.

20. The run-flat tire of claim 13 wherein the surfactant is a silicone surfactant.

21. The lubricant of claim 20 wherein the surfactant is an alkoxylated silicone.

22. The lubricant of claim 12 wherein:

(a) the carrier fluid is present in an amount ranging from about 10% to about 95%, by weight, based upon the total weight of the lubricant and is selected by the group consisting of polyethylene glycols, polypropylene glycols, polybutylene glycols, polyhexylene glycols, glycerin, sorbitol and mixtures thereof,

(b) the thickener is a clay selected from the group consisting of bentonite clay, hectorite clay, and mixtures thereof, the clay being present in an amount ranging from about 0.5% to about 40%, by weight, based upon the total weight of the lubricant, and

(c) the surfactant is an alkoxylated silicone surfactant.
